

Mag chloride is coming ... are you protected?

... NEWEST INNOVATION IN MAGNESIUM CHLORIDE PROTECTION

For optimum protection, apply weekly

Help protect with ...

technology to keep your vehicles looking younger™
COMTEC GUARD™
polymer clean, shine, protectant & brightening system

total VEHICLE protection package!

- COMTEC SHIELD™ undercarriage
- COMTEC SHINE™ polymer presoak
- COMTEC ENHANCE™ brightening presoak
- COMTEC SHIELD™ surface protectant

Clean. Shine. Brighten. Protect.

COMTEC GUARDS against ...

- underbody corrosion
- winter de-icers
- harmful UV rays
- environmental pollutants
- brake dust
- road contaminants
- acidic bugs
- windshield glare on pitted windows
- acid rain

and helps protect and brighten ...

- painted vehicle surfaces
- headlight plastic
- black plastic trim
- chrome and alloy wheels

Added Plus ... great alternative to an express wax!

Another quality innovation brought to you by

Magnesium chloride damage cannot be repaired, it can only be prevented.

FYI: MAGNESIUM CHLORIDE

Magnesium chloride is an effective, yet corrosive, de-icer used to keep ice and snow from forming on the road. While mag chloride makes the roads safer and addresses EPA pollution concerns ...

... magnesium chloride does
have some downsides.

- Magnesium chloride is especially corrosive to vehicles
- Vehicles need to be washed following a snowstorm to remove the damaging magnesium chloride
- The undercarriage of a vehicle needs to be washed well and frequently to avoid corrosion of vital parts
- According to an article in the Summit Daily News, any metal part on a vehicle is susceptible to the damaging effects of mag chloride
- According to an article in the High Country News, magnesium chloride can be especially damaging to "electrical wires, nuts, brake shoes and even ball joints" making a vehicle unsafe to drive
- According to the spokesperson for the CDOT (Colorado Department of Transportation): magnesium chloride will ruin chrome trim
- CDOT "concedes the (magnesium chloride) has corrosive properties and urge(s) people to wash their cars to avoid rust"

For added protection ... utilize our **COMTEC GUARD™** polymer clean, shine, protectant & brightening system to keep your car safe from the damaging effects of magnesium chloride!

**Bottom line, to protect your car from the
damaging effects of mag chloride, you
need to wash your car as often as
possible and protect with COMTEC GUARD™**

Now featuring ...
technology to keep your vehicles looking younger™
COMTEC GUARD™
polymer clean, shine, protectant & brightening system
